Be Inspired Be Future

- Physical foaming agent, density 20 kg/m³
Chất phụ gia tạo bọt vật lý, mật độ 20 kg/m³
- No change to your current equipment/process
Không cần thay đổi thiết bị/quy trình hiện tại của bạn
- Suitable for plastics, rubber, silicone, thermoplastic elastomers, coatings,...
Phù hợp cho nhựa, cao su, silicone, nhựa đàn hồi nhiệt, lớp phủ,...

MEGA MASTER

eFoam Physically Crosslinked **IXPE / PP Foam**

- ◆ Evenly Distributed Fine Cells with High Stability Quality
- ◆ UL HF-1 Certified.
Complies with REACH and RoHS
- ◆ Extremely Low Thermal Conductivity
- ◆ Anti Corrosive. Easily Converting. Anti-Aging.

eFoam Ultra Thin and Tape Grade

Excellent Elongation.
Easy Fabrication.
Anti-Acid and Alkali.
Anti-Aging.

Good for :
Vehicle. Solar Panel.
Medical Gasket.
All Kinds of
Adhesive Tapes

Golden Light

GOLDEN LIGHT INFORMATION TECHNOLOGY CO., LTD

Proudly serving as the leading provider of comprehensive solutions, equipment distribution, and top-quality supplies in the printing, advertising, packaging, and textile industries for over 20 years.

Operating nationwide with experienced and highly skilled staff and technicians, we always strive to bring customer satisfaction through high-quality products, meeting every customer's needs, and providing optimal, consistent, and reliable post-sales services.

Are you having trouble processing preservation materials and insulation materials?

Accumulated total sales 1000 units, our strong confidence

ACS Resolves

Angle reciprocating cutter change the common sense of heat insulating materials and heat insulation material processing.

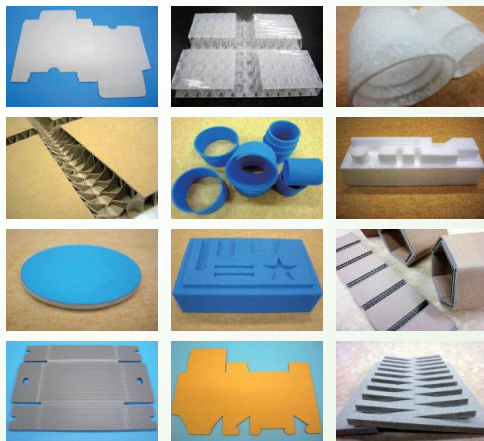

ACS

There is no limitation. An excellent multi-cutting machine that cuts through any materials.

An ACS multi-cutting machine is capable of quick processing, done beautifully and efficiently. We propose this high-end machinery which has superior productivity with high speed and accuracy that exceeds conventional sample cutting machines

ACS from Japan, specializes in researching, developing, and providing industrial digital cutting machines for the hardcover, carton, packaging, and display advertising industries.

COMPANY PROFILE

Donglan Materials committed to becoming a global leading supplier of high-end fine chemical materials.

The product series include:

CROSS-LINKING AGENT BIPB line ,
HNBR series products and Photovoltaic series products.

CROSS-LINKING AGENT B13

B13 can be used as cross-linking agent for EPDM rubber, ethylene-vinyl acetate copolymer, TPAAE, POE, OBC, silicon rubber, HNBR, fluorine rubber, FFKM, chlorinated polyethylene, etc. with advantages of odorless and high cross-linked.

It is suitable for Shoe Material Industry, such as IP, MD, and Foaming.

Address: Zone 4, Huangma Industry Park, Qinbei District, Qinzhou City,
Guangxi Zhuang Autonomous Region, China

SILICONE MATERIAL

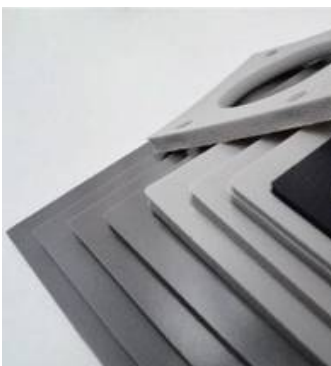

Silicone foam

Resistant to temperature extremes,
UV and ozone.
Excellent compression-set and
creep resistance.

Silicone encapsulant

Compliance with the most stringent
UL flame ratings
Manufactured in an ISO-9001:2000
certified facility

Thermal conductive silicone sheet

Extremely resilient to mechanical
fatigue.

Sun-Tech product lines are the Chinese leader in Silicone foams, Thermal conductive silicone sheet, and Silicone encapsulant used for gasketing and sealing applications.

省级化工园区+三十万吨聚氨酯材料产能

BUILD A RESOURCE SHARING
PLATFORM FOR POLYURETHANE INDUSTRY

Founded in April 2020, Shandong Yiborun New Material Technology Co., Ltd. is located in Shandong provincial chemical industrial park-Wudi Xinhai Industrial Park in Binzhou City. Phase I is the project to produce 100,000 tons of polyurethane-polyether material and Phase II is the project to produce 200,000 tons of special materials.

Our Company is a national hi-tech enterprise integrating technological R&D, intelligent manufacturing, sales and after-sales service of new polyurethane materials. The products are used in energy saving and heat preservation, mine safety, sports and health and home appliances, automotive, high-speed rail, military, aviation, plastics, 3D printing, light-curing coatings and other industries.

湖南精正设备制造有限公司

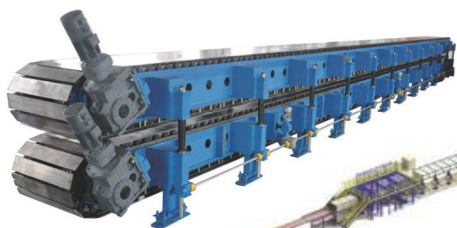

Hunan Jingzheng Equipment Manufacture Co., Ltd.

湖南精正设备制造有限公司系我国聚氨酯装备机械的骨干企业，其产品链在行业内为最全最长。产品服务于汽车内饰业、家电制造业、保温建材业等领域，已被国内主要用户及世界 500 强多家企业采用，产品进出口十多个国家。公司永远致力于为广大客户提供一流的产品和至诚至周的服务。

Hunan Jingzheng Equipment Manufacture Co., Ltd is the backbone enterprise of the polyurethane equipment machinery industry in china. Our product chain is the longest and most comprehensive in the industry. The service filed covers automotive seats and interiors, home appliance, thermal insulation building material etc. Our products have been adopted by major domestic users and multiple world top 500 companies, also been exported to more than ten countries. Our company is always committed to providing first-class products and sincere services to our customers.

主要产品 Main products

- 高压发泡机
High pressure foaming machine
- 弹性体浇注机
Elastomeric casting machine
- 双履带连续板材生产线

Company Profile

Shunda group is an international company specializing in the research, development, production and sales of polyurethane, and is committed to becoming the world's leading comprehensive polyurethane service provider. After more than 20 years of development, relying on continuous innovation of core material technology, leading insulation engineering technology and perfect construction management, to provide global customers with more competitive polyurethane products and insulation system solutions.

Yantai Sanjiang Chemical Industry Materials Co, Ltd is established in 2010 by Shunda group as its international sales company, to sell the blend polyol and Pu sandwich panel, and to undertake the cold chain insulation project abroad which has already set up several agents and warehouses in China, to cover Europe, Africa, Middle East, Southeast Asia, South Korea, Japan and so on

CONFERENCE AGENDA

"Redefine Foams"

The 3rd Foams and Applications International Forum

August 23, 2023
 SECC, Ho Chi Minh City, Vietnam

Time	Topics	Speaker
Opening Ceremony		
09:00-09:10	Leaders of Associations and International Guests Gathering to the Opening Ceremony Area.	
09:10-09:13	Introduction Video of the Exhibition (Warm-Up Video)	
09:13-09:15	Host Speech by HJT Exhibition (Shanghai) Co., LTD.	
09:15-09:20	Welcome Speech by the Leader of VPA	
09:20-09:25	Welcome Speech by the Leader of VSPA	
09:25-09:30	Welcome Speech by the Leader of SACA	
09:30-09:35	Welcome Speech by the Leader of VEIA	
09:35-09:55	VIP Exhibition Tour	
Lectures by Relevant Associations in Vietnam		
10:00-10:30	SLA: Talk About the Market Prospect of Foam Shoe Materials Combined with the Current Situation and Development of Vietnam's Shoe Industry	
10:30-11:00	SACA: Share the Development of Polyurethane Rigid Foam, EPS and XPS in Vietnam's Building Materials Market	
11:00-11:30	VSPA: Talk About the Development Prospects of Foam Materials in Vietnam Combined with the Development of Vietnam's Plastics Industry	
11:30-13:00	Break Time	
13:00-13:30	VEIA: Vietnam Electronic Industries Association	
13:30-14:00	VINPLAS: Share the Current Situation and Development Prospects of Foam Packaging Solutions in Vietnam	

Expert Talk		
14:00-14:30	SABIC Innovative and Broad Foam & Lightweight Solutions	Andrew Chen, Market Development & Technical, SABIC
14:30-15:00	Expancel Microspheres, Your Engineered Solution	Jet Yu, Emerging Markets Marketing Lead, Nouryon
15:00-15:30	Styrene Block Copolymers(SBC) in the Development of Foam Molding Technology and the Latest Footwear Material Applications	Walker Ye, Technical Manager of Global Application R&D, TSRC CORPORATION
15:30-16:00	Supercritical Foaming Equipment of TAIAN STRENGTH	Tina Ji, Foreign Trade Manager, Taian Strength Equipments Co., Ltd.
16:00-16:30	PE Foams in Acoustic Application	Manish Naik, General Manger, Supreme

August 24, 2023
SECC, Ho Chi Minh City, Vietnam

Time	Topics	Speaker
10:00-10:25	EPS Circularity with Sunpor	Jason Shiu, Asia Representative, SUNPOR Kunststoff GmbH
10:30-10:55	SMART EPS, Sustainable Solutions	Kayla Zheng, Asian Sales Manager, Hirsch Maschinenau GmbH
11:00-11:25	Advances in the Biopolyurethane Foams	Huafeng Tian, Professor, Beijing Technology and Business University
11:30-12:00	Development and Innovation of Polyurethane Rigid Foam	Jerry Gu, Supervisor of Production Dep. Zhongshan BASD Chemical Technology Co., Ltd.
12:00-12:30	High Pressure Cyclopentane Foaming Machine Technology	Yu Yi, Sales Director, Maron Mechatronics Engineering

*The meeting schedule is subject to the site

EXHIBITOR INTRODUCTION

B-FCTL Co., Ltd.

Booth No. E17

COMPANY DESCRIPTION

B-FCTL Co., Ltd. is located in Cangzhou Lingang Economic-Technological Development Zone, a National Chemical Park in Cangzhou city, Hebei Province, covering an area of 266,664 . As a key technological breakthrough enterprise of Green Manufacturing, B-FCTL was selected as one of the 83 "China Green Manufacturing System Integration Projects" initiated by China for the first time in 2016. As a National High-Tech Enterprise, our company was honored as a National supported "Little Giant" in specific and critical fields, also a National Green Factory and a Provincial Manufacturing Champion in Hebei Province.

B-FCTL Co., Ltd. was founded by a group of experienced chemists and chemical engineers. Relying on the core technology, our company has developed unique ideas and methods for the research and development of green synthesis processes of chemicals, explored and designed seven types of chemical reactions to achieve green synthesis process routes, and own the outstanding ability to transform the industrial preparations for green chemicals, which constitutes an critical engine and core competitiveness for the rapid development of the company. Since its establishment, B-FCTL has developed a number of green synthesis processes for chemicals, showing significant low-carbon, environmental and economic advantages compared with traditional ways, and became a strong competitor in the market.

The company's main products including: Polyurethane, Pharmaceuticals, Petrochemicals, Textiles, Electronic Chemicals, Molecular Sieve Catalysts etc.

Polyurethane Catalysts: At present, our company's DMDEE occupied dominant position in global market and is the benchmark of polyurethane catalyst in the world, as well as the manufacturer of polyurethane catalysts such as TEDA and DMAEE etc. Meanwhile, we have developed a variety of new polyurethane catalysts in the sectors of HFOs application, reactive polyurethane catalysts and new one-component polyurethane catalysts with independent Intellectual Property Rights.

Along with the launch of various new polyurethane catalysts, our company will also release a series of relevant polyurethane silicone oil homogenizers.

Textile and electronic chemicals industry: Our product NMMO has become a benchmark in this area after its launch and has strongly promoted the development of China's Lyocell fiber industries. With an annual Production Capacity of 35,000 tons of electronic-grade and textile-grade NMMO, our products have been widely used by major manufacturers in related fields worldwide.

Moreover, our company will also develop matching Hydroxylamine and Propylgallate products in the near future.

Petrochemical Additives Industry: As an alternative, our company's desulfurization additives have been used by many domestic relevant enterprises. As its higher desulfurization effect, less decomposition, less foaming & loss than traditional desulfurization additives, so our company's product costs less and be more welcomed.

Our company is also the manufacturer of DGA, a hydrogen sulfide desulfurization agent, and a manufacturer of neutralizing corrosion inhibitor for refineries in China, supplying thousands of tons of neutralizing corrosion inhibitor to domestic and overseas markets every year.

Molecular Sieve Catalyst Industry: Our company has a production capacity of thousands of tons of molecular sieve catalyst every year, which can be used as raw materials for catalyst plants.

Outreach technical service projects: Our company can also provide outreach services of green chemical synthesis technology to promote sustainable transformation for other chemical industrial customers. As a good start, the company has assisted related domestic pesticide plants to realize the project of green production of propachlor, and achieved the successful start-up of 10,000 tons of propachlor at one time.

Since its establishment, B-FCTL adheres to the path of independent innovation and insists on the concept of "green chemistry" to guide the development. As a fine chemical company focusing on the R&D of green chemical synthesis technology and innovation at the intersection of multiple disciplines, we are committed to solving the problem of "three wastes" in the process of chemical synthesis from the beginning source.

Cangzhou City Junchiweiye Chemical Co., Ltd.

Booth No. C01

COMPANY DESCRIPTION

Cangzhou City Junchiweiye Chemical Co., Ltd., established in 2004, is a special chemical company with R&D, production and sales of polyurethane main materials, silicone surfactants, catalysts, polyurethane adhesive, CPU, flame retardants, and so on. Taking the construction of the provincial polyurethane new material engineering laboratory as an opportunity, had built a large-scale chemical enterprise group integrating PU products and PU special chemicals in one body, connecting upstream and downstream, and integrating domestic and foreign trade.

Changzhou Shunxiang New Material Technology Co., Ltd.

Booth No. F02

COMPANY DESCRIPTION

Changzhou Shunxiang New Material Technology Co., Ltd, founded in 2014, is a professional and technologically innovative material manufacturer specializing in utilizing supercritical physical foaming technology to provide customers with lightweight, high-performance, and recyclable physical foam thermoplastic elastomer granules and related technical solutions.

Our marketing center is in Shanghai, and we also have two factories in Changzhou, Jiangsu Province, both of which have passed international ISO:9001-2000 quality certification.

Our main products focus on the supercritical foaming thermoplastic elastomer granules, including E-TPU, E-TPX, E-TPO and E-TPA. Plus, we utilize the supercritical method to produce physical foam midsoles. We also manufacture liquid additives that resist aging and prevent yellowing in polyurethane products. Currently, our production capacity for foaming granules is 4000 tons per year, and for high-performance plastic masterbatch 2000 tons per year. What's more, we are capable of manufacturing one million pairs of mid-soles annually.

Crerax Science and Technology Co., Ltd.

Booth No. G06

COMPANY DESCRIPTION

Crerax is a leading provider of disruptive material science and technology solutions. Our microspheres and lightweight solutions have wide-ranging applications across 120+ industries, including shoe soles, printing inks, sealants and adhesives, automotive interiors, paint and coatings, air-dry clay, and more. Our solutions help global clients and various materials achieve lightweight and cost reduction, thermal insulation, surface modification, resilience, and other excellent properties, contributing to a safer, more comfortable, and sustainable life.

Elitecore Foam Machinery Co., Ltd.

Booth No. G01

COMPANY DESCRIPTION

EliteCore Specializing in Manufacturing Foam Machinery Mainly Used For PU Sponge Foaming, Sofa Furniture, Mattress Bedding Industry.

Since the establishment Year 2005, "Sincerity, Responsibility, And Permanence" are adopted as our Service-Principle to all our Customers, As well, "Quality is the Best and The Best is for Customers" has also been complied by all our Employees.

Our Company has a Strong Strength, has Own Land Property Right & has Own Built Factory Area of 20800 square meters, The Annual Sales of Standardized Products and Non-standard Customized Products reached more than 500 sets.

EliteCore professional Foam Machinery Products are exported to more than 200 countries and regions in Africa, America, Europe and Southeast Asia...etc.

Evergreen Home Furnishings (Vietnam) Company Limited

Booth No. E16

COMPANY DESCRIPTION

EVERGREEN HOME FURNISHINGS (VIETNAM) COMPANY LIMITED. is a comprehensive integrated strength company focusing on the research, development, production and sales of polyurethane sponge products. The company is located in the expanded industrial zone of Nam Tan Uyen, Tan Uyen City, Binh Duong Province, Vietnam. At present, the company covers a total area of 20,000 m² and has 1 automatic foaming line; multiple flat and straight cutting equipment; 3 sets of integrated precision CNC special-shaped production Assembly line; 1 roll material production line; 1 automatic mattress compounding, compression, rolling production line; 1 egg-shaped sponge forming machine and other new production equipment. The company has a professional and superb product research and development team, a group of excellent management personnel and a professional marketing team. For a long time, Gongdu has won the favor of customers with high-quality imported raw materials, careful selection and excellence in production technology, good product performance and quality.

Guangxi Donglan New Materials Co., Ltd.

Booth No. A17

COMPANY DESCRIPTION

Guangxi Donglan New Materials Co., Ltd. is located in the Zone 4, Huangma Industry Park, Qinbei District, Qinzhou City, Guangxi Zhuang Autonomous Region, China. The company is adhering to the corporate spirit of "focusing on details and daring to innovate", the business policy of "sincerity-based, customer-oriented, create value for customers" and the concept of "linking customers and the future with innovation and quality", striving to move towards the goal of "becoming a global leading supplier of high-end fine chemical materials".

The company's main products include:

1. CROSS-LINKING AGENT BIPB series products: odorless cross-linking agent for rubber, elastomers, shoe materials, wires and cables.

2. HNBR series products: additives in the military and electrical fields.

Photovoltaic series products: (1) TAEC products: cross-linking agent for POE, heterojunction and core packaging materials such as calcium iron ore in the photovoltaic field. (2) Calcium iron ore precursor: raw materials for calcium iron photovoltaic modules.

Guangzhou Goldenhighway Trading Co., Ltd.

Booth No. D02

COMPANY DESCRIPTION

Guangzhou Goldenhighway Trading Co., Ltd (hereinafter referred to as the "Company"), founded in 2010, is a core subsidiary of GHW International (09933.HK), which listed on the main board of the Hong Kong Stock Exchange. The company has established long-term and strategic partnership with many world-renowned chemical production enterprises over the past years.

The company's products are widely used in many fields such as polyurethane, pharmaceuticals, pesticides, coatings, daily chemicals and so on.

The company's production base is mainly located in Tai'an, China and Binh Duong, Vietnam. The company relies on GHW global industrial park to provide customized products and supporting services. The products use the current advanced technology and production equipment, and strictly benchmark the production of international and domestic standards.

The company's sales network is spread all over the country, and it has set up chemical warehouses covering most provinces and regions of the country to reduce inventory occupancy and accelerate circulation efficiency for customers. The multi-channel and quick logistics system built by the company with sea, ground and air integration makes the transportation of goods faster and safer. With the support of GHW International's global comprehensive network, we have provided high-quality professional product portfolio and supporting services to dozens of countries and regions.

Hirsch Maschinenau GmbH**Booth No. C05****COMPANY DESCRIPTION**

With more than 50 years of international experience, the HIRSCH Servo Group is the leading manufacturer and market leader in the EPS and EPP industry. Our activities are always focused on sustainability, resource efficiency and ecological responsibility. With consideration for origin, profession and progress, we achieve top performance.

The HIRSCH Servo Group, operating a total of 33 production sites in ten European countries and sales and service offices in China and America, is excellently positioned to act as a global player in the EPS and EPP industry and to provide the best possible support to customers with an exceptionally high level of expertise. As a stable employer, we unite more than 1,900 employees in our two business segments of Processing & Technology.

The wide range of applications for our products extends from packaging and insulation materials to molded parts for industrial applications and customised solutions. In the technology division, we produce energy-efficient, resource-saving plants for processing EPS and EPP. Top quality, reliability, logistical perfection and high innovative strength are our trademarks.

Hunan Jingzheng Equipment Manufacture Co., Ltd.

Booth No. G10

COMPANY DESCRIPTION

Hunan Jingzheng Equipment Manufacture Co., Ltd. founded in 1993, is the backbone enterprise of the polyurethane equipment machinery industry in China. Our product chain is the longest and most comprehensive in the industry. The service field covers automotive seats and interiors, home appliance, thermal insulation building material etc. Our products have been adopted by major domestic users and multiple world top 500 companies, also been exported to more than ten countries. Our company is always committed to providing first-class products and sincere services to our customers.

Jiangsu Cdchem Polymer Materials Co., Ltd.

Booth No. D01

COMPANY DESCRIPTION

Jiangsu Cdchem Polymeric Materials Co., Ltd. (Group Company) is headquartered in Jiangsu, and is a technology company that integrates innovative technology, production and manufacturing, supply chain, and services. As a multinational business group, Cdchem is committed to manufacturing global polymeric materials and has world-leading production and processing technologies and product lines for EPDM and NBR. Currently, Cdchem has subsidiaries and research centers in India, Japan, and Germany, and has established a partnership with the University of Akron in the United States. The company originated from Haiji Rubber Industry, which was established in 2005, and entered the field of rubber polymeric materials in 2019, launching comprehensive international development in the same year. Based on the philosophy of advancing with the times and continuous innovation, as well as the customer-centric service concept, Cdchem strives to become a world-leading brand in the field of polymeric materials by 2025. Cdchem International's rubber and plastic products have excellent advantages in sound insulation, noise reduction, shock absorption, thermal insulation, sealing, and flame retardancy, meeting stringent product standards worldwide. They are widely used in industries such as automotive, home appliances, electronics, and packaging. The product range includes but is not limited to engineering insulation boards and pipes of Class 0, B1, B2, composite-faced insulation boards and pipes, EPDM insulation boards and pipes, die-cut parts, and sealing strips. Our vision at Cdchem is to improve the world and everyday life through the innovation of our employees and chemistry. Therefore, Cdchem upholds this vision and is committed to improving the quality of life for people worldwide. At the same time, we focus on areas where we can create meaningful and sustainable change by leveraging the resources and expertise of our company and employees together with local partners.

Jiangsu OSiC Performance Materials Co., Ltd.

Booth No. E22

COMPANY DESCRIPTION

OSiC is a global performance materials company and we strive to be our customers' commercial partner of choice, since its inception we have supplied additives to the polyurethane foam industry. Our urethane additives comprises silicone surfactant, catalyst and processing additives. The industries we served include stabstock foam, rigid foam, microcellular foam, PU Leather and many others.

Our urethane additives have been formulated to meet performance and processing technology needs and are manufactured to exacting standards.

Equally important, our technical sales and service teams are available to work with you and provide additional product information and support to aid your selection of the best product for your specific application.

Our global reach enables us to work closely with customers to meet the highest standards for performance, quality and service.

Shaoxing Huachuang Polyurethane Co., Ltd.

Booth No. D30

COMPANY DESCRIPTION

Shaoxing Huachuang Polyurethane Co., Ltd. is specialized in the production of rigid polyurethane raw materials, polyurethane foam products, polyurethane spray equipment. It is an integrated private technology enterprise with national first grade qualification of undertaking various anti-corrosion insulation works and second grade qualification of refrigerator installation. The company is located in Shaoxing, a historical and cultural city, enjoying superior geological location and convenient traffic. Huachuang Company mainly engages in the production of rigid polyurethane spray combination polyether, polyurethane sandwich panels, cold storage doors, cold decorative corrugated board, polyurethane spray equipment etc. to achieve one-stop cold storage insulation construction, ensuring the project progress and quality to meet the needs of the market. Product application and construction involves building facades, cold chain logistics, food fermentation, equipment tank, pipe insulation and other energy saving fields.

The company has passed the certification of ISO9001:2008 international quality standard, ISO14001 international environmental standard. The company will strictly follow the standard requirements to strive to build the company into China's leading manufacturer of polyurethane.

Shijiazhuang Mingxu Chemicals Co., Ltd.**Booth No. F25****COMPANY DESCRIPTION**

Shijiazhuang Mingxu Chemicals Co., Ltd. is a professional specialty chemicals company in China and started in 2008.

It emerged as a professional pharmaceutical company by supplying high standard APIs, pharmaceutical intermediates especially used for cephalosporins, finished formulations meeting BP, USP, JP, EP and customer specifications.

From 2013, depending on deep understanding of market and sharp market perspicacity, Mingxu began to penetrate into polyurethane industry and develop fast in polyurethane additives which include amine catalysts, metal catalysts, flame retardants, processing aids etc.

We have stable and superior route of synthesis, strict quality control and quality assurance system, experienced and responsible team, efficient and safe logistics. Based on this, our products are well recognized by the customers in Europe, Americas, Asia, Middle East etc.

Mingxu chemicals are committed to serve our customers with superior products, stable supply, professional service and competitive price, contributing our customers optimized resources and reaching for a sustainable development of both sides.

Taian Strength Equipments Co., Ltd.

Booth No. E10

COMPANY DESCRIPTION

Taian Strength Equipments Co., Ltd. is a professional high-pressure equipment R & D and manufacturing of production enterprises. The main high-pressure autoclave equipment including supercritical physical foaming equipment, new powder material equipment and other high-pressure autoclave for new materials.

TAIAN STRENGTH equipment is widely used in aerospace, aviation, high-speed rail, shoe materials, packaging materials, sports equipment, children's park, environmental protection decoration and other fields.

For more than 20 years, Equipment of TAIAN STRENGTH has won the trust of customers at home and abroad with high-quality products, rich experience, professional technology and excellent service

The Supreme Industries Ltd.

Booth No. F22

COMPANY DESCRIPTION

Founded in 1942, Supreme is an acknowledged leader of India's plastics industry. Handling volumes of over 3,50,000 tonnes of polymers annually effectively makes us the country's largest plastics processors. Our 25 advanced plants are powered by technology from world leaders, and complement our extensive facilities for R & D and new product development. In fact, Supreme is credited with pioneering several products in India. These include Cross- Laminated Films, HMHD Films, Multilayer Films, SWR Piping Systems and more.

Supreme's Protective Packaging Division plays the role of a solution provider to clients in diverse industries. Its exhaustive product range and the ability to provide tailor made packaging solutions is an ideal combination for the customer.

THIEN PHU MUT CO., LTD.
Booth No. E20
COMPANY DESCRIPTION

Thien Phu Mut (TPM) Co., Ltd. located at Bau Bang Industrial Zone in Binh Duong and produces PE FORM, EVA and ARTILON that be used mainly as materials in the backpack, golf bag and bags for fishing, outing & picnics.

The one of our strength point that the other companies do not have is directly producing PE FORM, EVA AND ARTILON by our own technology. It drives us to offer the competitive prices for our customers. Our main customers are PUNGKOOK, SHILLABAGS, SUNG JIN, VISION BAG, SHINWOO, SAMBU, TBS Group, AJSolution and NEOBAGS, which are producing backpack brands as follows. OSPREY, ARC TERX, COLUMBIA, BERGHAUS, CALVIN KLEIN and SIMMONS.

We are actively participating in GREEN ENVIRONMENT by recycling materials. TPM is ready for 2nd leap to provide better service to existing and new customers and further develop TPM. We would like to publicize TPM's high technology and good service to a lot of customers that do not know TPM, and provide our good products to them.

Tianjin Jiatai Weiye Chemical Co., Ltd.
Booth No. C05
COMPANY DESCRIPTION

Tianjin Jiatai Weiye Chemical Co., Ltd. was established in November 2007. It is a modern chemical company specializing in the production of expandable polystyrene (EPS) resin, with an annual output of 120,000 tons of polystyrene.

Tianjin Jiatai Weiye Chemical Co., Ltd. is located in the beautiful coast of the Bohai Sea - Tianjin Dagang Petrochemical Industrial Park. With the help of Tianjin's excellent deep-water port, it has provided convenient conditions for the import of raw materials, auxiliary materials and the export of EPS products. Domestically, it can radiate the three north regions such as North China, Northeast, Northwest, and Henan and Shandong markets. The main varieties produced are: special light P material, fast material B material, standard material E material, fuel resistance F material, high foaming flame retardant FB material, high flame retardant FS material, high strength and high flame retardant FSH Materials, non-HBCD flame-retardant FHE materials, non-HBCD graphite polystyrene FGH (suspension method) materials, graphite polystyrene FGE (suspension method) materials; the company's innovatively developed graphite polystyrene series of extrusion methods:

Extruded graphite polystyrene SC material, extruded graphite polystyrene S-33 material, extruded graphite polystyrene S-32 material, etc., fill the domestic gap and are at the international leading level, especially S-32 With low thermal conductivity, high strength and B1 flame retardancy, it is the preferred insulation material for booming passive houses.

Expandable polystyrene (EPS) has the characteristics of low thermal conductivity, good thermal insulation, small water absorption, good shock resistance, aging resistance, high compressive strength and good mechanical strength. It is currently recognized as the most economical buffer, heat preservation and sound insulation material in the world. It is widely used in packaging products, new building materials, plastic floating materials and exterior wall stickers.

Adhering to the people-oriented concept of "people-oriented and serving the society", the company fully implements the internationally standardized quality management system, and strives to "create the greatest value for customers, The purpose of "the enterprise wins the maximum return", with "quality first, cost-oriented" as the sales strategy, focusing on research and development and innovation, to achieve product diversification, reduce costs and reduce consumption.

Tianjin Jiatai Weiye Chemical Co., Ltd. is moving towards higher and further goals with steady and practical steps. Let's join hands for a better future!

Wuxi Mu TakTechnology Co., Ltd.

Booth No. A05

COMPANY DESCRIPTION

Wuxi Mutak Technology Co., LTD. National High-tech Enterprise Location Jiangsu Yixing Economic Development Zone is a professional production and sales of all kinds of EVAXPE foam slice laminated composite processing equipment enterprises. Main products: high-speed splitting machine MD-601 Enhanced foam splitting machine MD-601D rubber foam automatic splitting machine MD-690T yoga mat yoga brick glue-free composite machine MD-366 /MD358 In the manufacture of equipment, but also provide sophisticated equipment accessories, professional and fast technical services. We have a professional technical team can provide you with the best product design, the most reasonable equipment collocation, the most professional and fast service, to meet your needs in product yield, production efficiency and safety and other aspects.

Our products are widely used in automobiles, toys, home MATS, 3D wall stickers, diving suits, insulation materials, electronic packaging and other fields.

Xiangyuan Foam (Vietnam) Co., Ltd.**Booth No. E02****COMPANY DESCRIPTION**

Xiangyuan Foam (Vietnam) Co., Ltd is a wholly-owned subsidiary of Hubei Xiangyuan New Material Technology Inc. (China Stock Code: 300980). It was established in June 2021 with a registered capital of 4 million US dollars. The company is located in Guiwu second Industrial Zone, Bac Ninh City, Vietnam. Hubei Xiangyuan New Material Technology Inc. was founded in 2003. It is a high-tech enterprise that integrates R&D, production, and sales of eco-friendly crosslinked polyolefin foam, micro-cellular PU foam, silicon foam, thermal runaway materials and so on. With advanced equipment and technology. Our facilities are equipped with 8 irradiation lines, 39 extrusion lines and 56 foaming lines, enabling us to produce IXPE, IXPP, PU, silicon with different specifications to meet the diverse needs of our customers. At Xiangyuan, we innovate independently and have developed numerous core technologies in foaming equipment, IXPP foaming, PU foaming, silicon foaming and ultra-thin foam foaming. Our products are widely used in various industries, including construction, consumer electronics, automotive interiors, new energy, medical, and packaging. Xiangyuan strictly adheres to the ISO 9001, ISO 14001, IATF 16949 and ISO 45001 international quality assurance systems. We not only manufacture high-quality products but also provide efficient solutions to our customers.

Xuchuan Chemical (Suzhou) Co., Ltd.**Booth No. D25****COMPANY DESCRIPTION**

Xuchuan Chemical was founded in 2007, headquartered in Taicang Port, Jiangsu Province, national High-tech Development Zone. Xuchuan Chemical has four large-scale production bases. It is a state-level high-tech enterprise, National specialized special new small giant enterprise. Xuchuan Chemical's main products cover polyester polyols, polyurethane stock, polyurethane resins for leather and textiles, polyurethane adhesives, polyurethane hot melt adhesives, waterborne polyurethane resins, solvent-free polyurethane resins and polyurethane elastomers. Xuchuan Chemical has now become the world's largest manufacturer of polyurethane resin for synthetic leather, taking a leading position in the field of polyurethane raw liquid and polyol products in China. Xuchuan Chemical is committed to providing customers with a full range of raw materials and technical solutions, its products are widely used in daily life, industrial fields, as well as medical, military, fire and other high-end application fields. Its products are exported to more than 40 countries and regions and highly recognized by customers and industry.

Zhejiang Thysun Technology Co., Ltd.

Booth No. G05

COMPANY DESCRIPTION

Zhejiang Thysun Technology Co., Ltd. is located in Hangzhou, Zhejiang Province. It is a new scientific and technological enterprise specializing in the research and development, production and sales of new silicone materials. Main products: Foam material, thermal conductive material, potting adhesive, ceramic silicone, solid silicone. The SH organic silicon series products have many properties such as high and low temperature resistance, heat aging resistance, UV resistance, high flame retardancy, sound absorption, and shock absorption in important fields such as power batteries, energy storage batteries, buildings, photovoltaics, rail transit, electronics, and electrical appliances. The Sun-Tech team will continue to explore new product research and innovation in production processes, efficiently and high-quality meet the personalized needs of customers in various fields, and provide one-stop solutions.

Provide Better Products and Services

www.echemi.com

The World's Leading Digital Cross-Border Chemical B2B Platform

1. Market Price & Insight

Provide daily, weekly and monthly reviews of 500 chemical products in China market; Help overseas buyers quickly get market and business information.

2. News

Buyers can realize the dynamic changes of the global chemical industry in one stop.

3. Exhibition

Focus on paint and coating, rubber and plastic, water treatment, pharmaceutical, food and nutrition, cosmetics and other fields of global exhibition real-time dynamic information; Strategic media cooperation with global exhibition organizers.

4. Trade Data

Import and export data of more than 200 countries, including bill of lading data and customs declaration data; Fastest data updated by day.

5. Encyclopedia

Free query of physical and chemical properties, production process, safety, SDS and other related information of millions of chemicals.

6. Full Category Supplier Database

Database of more than ten thousand chemical suppliers certified by CBI, Tianyancha and other third-party qualified companies.

7. Local Mall

Join ECHEMI's US warehouse or warehouses located in Zealand, South-Holland, Albrandworth and immediately possess local customers.

8. Supplier VIP Service

Unlimited release of products; Personalized shop; Zero distance communication with online buyers.

9. Platform Inquiry

Monthly inquiry quantity is 10,000+; The inquiry involves many categories and are widely distributed to all countries and regions.
